Summary

Final-year B.Tech Computer Science student (2026) with strong foundations in JavaScript, Java, Data Structures, Algorithms, and Object-Oriented Programming. Hands-on experience building scalable full-stack applications using React.js, Node.js, Express.js, MongoDB, and MySQL, focusing on REST APIs, debugging, and backend workflows. Strong problem-solving mindset with fast learning ability and ownership in real-world project development.

Education

PBR Visvodaya Institute of Technology and Science, Kavali	2022 – 2026
Bachelor of Technology in Computer Science and Engineering	84.65%
Sai Cooperative Junior College, Kavali	2020 – 2022
Intermediate (MPC)	70.60%
AP Model Government School, Kondapuram	2019 – 2020
SSC	89.33%

Skills

Programming Languages: JavaScript, Java, SQL
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems
Tools: Git, GitHub, Postman

Projects

Foodie { Food Ordering System Oct 2025 – Feb 2026

- Developed RESTful APIs for authentication, cart, and order workflows, handling 1.3K+ monthly API requests using JWT-based authentication.
- Improved backend performance by implementing caching and optimizing request handling, reducing redundant database queries.
- Designed scalable database schemas and responsive frontend workflows for cart, orders, and user management.

Skill-Swap { Real-Time Skill Exchange System Feb 2025 – Apr 2025

- Built a real-time platform using Socket.IO, enabling concurrent multi-user communication.
- Designed REST APIs and database schemas for user profiles, session management, and skill matching.
- Implemented JWT authentication with HttpOnly cookies and improved session reliability.

Professional Experience

CodeTantra, Java Full Stack Intern May 2025 – Jun 2025

- Developed a Hotel Management System using Java, React.js, and SQL.
- Implemented frontend-backend integration, backend logic, debugging, testing, and maintenance.
- Optimized SQL queries, improving backend efficiency and reducing manual processing.
